

E100-PT Series Epoxy

The E100-PT Series Epoxy line is a 100% solids, industrial strength, two component coating. Available in 10 stock colors and a true clear version, the E100-PT Series Epoxies are engineered and designed for use on concrete substrates of virtually any stable condition including most surface deteriorated surfaces in need of repair.

E100-PT Series Epoxies exhibit compressive and tensile strengths in most cases 2 to 3 times that of conventional concrete and there act as a superior protective coating to concrete surfaces such as warehouses, garage floors, parking garages, retail stores, and more.

Because the E100-PT Series Epoxies are VOC free, they can be using indoors without the need of excessive ventilation.

Also available but not shown is a true clear version for use as a top coat for any of the colored epoxy coatings or polymer modified cementitious coatings.

Color samples on this chart represent the color of the finish as closely as possible. Variations can be expected due to product thickness, clear coated and methods of application.
